

BIOGEL
Soil Food

Biogarden

**Organic certified fertiliser for annual turf maintenance.
Medicated with beneficial soil microorganisms and seaweeds
NPK 6-5-7 + 4MgO**

BENEFITS

- Certified Bio maintenance fertiliser for public and private gardens where no chemical products are allowed. It feeds naturally lawns, trees, bushes and flower beds
- Balanced NPK formula, rich in magnesium, contains spores of beneficial soil bacteria. Increases soil fertility and health, optimizing soil-plant exchanges in the rhizosphere
- Odorless, does not contain poultry or animal manure
- Turf feed for organic managed golf courses and sports fields. Active in the growing periods of the year, ensures a long lasting grass quality
- Rich in organic seaweed meal; prevents heat and cold stresses by strengthening, enhancing and extending turf root system
- Ideal maintenance fertilizer also for vegetable gardens, vineyards and orchards. On roses favors a lasting bloom with magnificent colors

TECHNICAL FEATURES

6% Nitrogen (N): 6% organic
5% Phosphoric acid (P₂O₅) 4% water soluble
7% Potassium oxide (K₂O) water soluble
4 % Magnesium oxide (MgO) water soluble
Contains hydrolyzed collagen and seaweed flour meal
With selected soil micro-organisms,
Fertiliser registered at protocol nb. 0017232/16 /SIAN,
at the Italian Agricultural Ministry (MIPAF) as
permitted for organic farming
Granular size: 1,5- 2,0 mm flakes

Lawn fertilizer, 100% organic, natural and environmentally friendly, containing collagen, and seaweed meal and micro-organisms, specific organic matter mineralizers. Ethical and eco-sustainable product with its organic ingredients derived from circular economy. Composed by mini flakes, easy to distribute and dissolve. Biogarden is rich in proteins that, when degraded by microorganisms, gradually release nutrients in the soil for 1-2 months. Enriches the soil, increasing its fertility and biological life. Effect is visible from 7- 10 days, depending on soil temperature

APPLICATION METHODS

Mature lawns (maintenance): 80 gr/m² , 3 times a year:
Early Spring, late Spring and early Autumn
Spring fertilisation of trees, roses and bushes:
100 gr /m² in Springtime (March-April). Incorporate in the first 5 cm. Irrigate for 10 minutes after application
Planting of trees, roses and bushes: 100-200 gr /m² ,
depending on the size of the plant.

PACKAGING:

20 kg bags on pallets of 39 bags (780 kg)
