

Bioturbo

**Organomineral turf feed with biochar and collagen.
Ideal for Spring green-up, gives growth and color all year long
NK 14-5 +2Fe**

BENEFITS

- Guarantees a fast growth and color response, providing a controlled release of nutrients up to 45 days from application
- Thanks to its biochar + collagen combination, is an extraordinary organic matter bio degrader
- Recommended for sandy turf surfaces (e.g. sports pitches, natural and hybrid), very poor in beneficial microbial activity
- Does not require frequent mowing; is particularly suitable for lawns managed with robot mowers and with mulching systems
- Helps hardening grass shoots and leaves, increasing vertical growth and grass rebound after mower passage
- Excellent maintenance fertilizer for warm season grasses (C4) such as Bermudagrass, Zoysia, Saint Augustinegrass and Seashore Paspalum.

TECHNICAL FEATURES

14% Nitrogen (N): 2% organic (collagen), 9,5% ammonia, 2,5% ureic
5% Soluble potassium oxide (K₂O)
25% Sulphur trioxide (SO₃) soluble
2% Iron (Fe) water soluble
7.5% (C) from hydrolyzed collagen
5% Biochar (Herbchar)

Granular size: 2,5 mm

Ethical and sustainable fertilizer; its collagen and biochar ingredients derive from circular economy. Recommended for regular maintenance of fairways, sports fields and garden lawns, it is particular suited for lawns mowed with mulching systems and robotic mowers. Consists of odorless, homogeneous, compact granules, easy to distribute and dissolve. Contains a special biochar, Herbchar that provides the perfect habitat for beneficial soil microorganisms and hydrolyzed collagen, made of 100% amino acids. Protein nitrogen and other nutrients are assimilated by soil beneficial bacteria in the process of organic matter breakdown. They are then released to the grass roots over several months.

APPLICATION METHODS

Regular turf maintenance: 35-40 gr./m² (350-400 kg/ha) in all phases of grass intense vegetative growth starting from early Spring to late Autumn

Irrigate for about ten minutes after application

PACKAGING: 20 kg bags on pallets of 1080 kg
