

Herbalù

**Long-lasting paint with a fantastic natural light green colour.
For 3 months hides discoloured lawns and dead turf**

BENEFITS

- Restores turf natural light green color, disguising yellowing and burned patches (oil stains, algae, footsteps on frozen turf, human errors)
- Its resin content favors maintenance of the green colour for more than ninety days, making it resistant to water from irrigation and rain
- Hides worn out turf in penalty and midfield areas of stadiums and sports fields; paints bare soil of unrepaired divots also on fairways and tees
- Has the same tonality of *Poa annua*. In winter disguises dead crabgrass and dormant common bermudagrass patches
- Ideal with the Herbasprayer spraying machine and Herbalance lance for perfect, 100% guaranteed coverage

TECHNICAL FEATURES

Non-toxic, long-lasting natural green paint with special tackifiers and adhesives. Instantly and permanently restores the turf, giving it a brilliant natural green color. Resistant to photo-degradation, it is gradually removed with mowing. Safe for plants, pets and children, it can be washed away with normal detergents and in the spray tank with Herbaclean

APPLICATION METHODS:

For extensive applications with spray tank: 10-12,5 lt/ha in 500 liters H₂O

With pedestrian sprayer (Herbasprayer): 1,0-1,5 liter in 50 liters H₂O for 1000 m² of surface.

With backpack sprayer and hand lance (Herbalance): 0,25-0,30 liters in 10 liters H₂O in 250 m².

Dosage is related to the intensity of green coloration desired. For a more intense color, water volume can also be reduced

Do not treat marble or stone areas. Protect from frost. Time for opening to foot traffic and practice: at least 1 day with sunny dry weather, up to 4 days with little sun or humid weather.

PACKAGING: 5liter drum
