

Crazy Greener

**Iron free cosmetic foliar fertilizer. Feeds and protects turf with instantaneous and long lasting natural color effect
N15 + C3 Pigment**

BENEFITS:

- Colors and nourishes grass instantly, lasting up to 4-5 weeks. Coloration slowly fades away, depending on mowing frequency
- In late Autumn delays the entry of turf into winter dormancy and disguises all foliar yellowing caused by freezing temperatures
- In the growing season hides foliar yellowing caused by stress: e.g. high temperatures, nutritional imbalances and diseases
- Helps to achieve a natural turf coloration without iron; feeds and colors turf suffering of superficial black layer problems
- Anticipates Spring green up in late Winter (end of February) without stimulating Poa annua growth and hiding its presence
- Contains infra-red light protecting pigments. Recommended, tank mixed with Recovery, for spoon feeding fertilizations in summer

TECHNICAL FEATURES

15% Total nitrogen (N): 15% ureic nitrogen
C3 FIR light reflecting green pigment
Contains organic facilitators of foliar absorption

Herbafer Crazy Greener is a pH-neutral, iron-free foliar greener that combines enhanced tissues vigor and strength with increased turf visual appearance and color. Combats environmental and nutritional disorders, helping turfgrass to maximize its aesthetic and functional quality. Combines the enhanced aesthetic quality of C3 pigment with the bio-nutrition of Greener, here present in a special formula containing urea and organic chelates but no iron.

APPLICATION METHODS:

During the growing season on partially chlorotic (C3 and C4) lawns: 2.0-2,5 liters/1000 m² in 80 liters of water.
For spoon feeding operations tank mixed with Recovery: 1.5 liters/1000 m² in 80-100 liters of water. Repeat every 20 days.

In Autumn to delay on C3 and C4 turf species foliar yellowing caused by cold temperatures and in early Spring to anticipate green-up: 2.0-3.0 liters/ 1000 m² in 80 liters of water. Make first application in November and repeat every 25-30 days.

Note: Spray Crazy Greener on dry grass. Make sure that the color dries completely before using the structure.

PACKAGING: 5 liter drums and 1 liter bottle in 16 liters boxes
