

Herbalance

Special spray lance for painting localized turf areas. Sprays every kind of liquid chemical with precision and accuracy

BENEFITS

- By changing the nozzles, it allows great flexibility in dosages, uses and products: from paints to pigments, to fungicides, weed killers and foliar fertilizers.
- Connected to Herbasprayer walk-behind sprayer and iGO line marker machines. On football fields, with a single machine, you can do both chemical treatments and line marking
- Perfectly suited for the creation of logos and designs, permanent or removable, on all surfaces, from those in natural grass to the asphalted car parks
- Made of stainless steel, it is durable and resistant to corrosion by chemicals
- Lightweight and easy to use. Its ergonomic stock ensures a secure grip; has a safety lock to prevent unintentional sprays

TECHNICAL FEATURES

Spray lance, compatible with Herbasprayer turf spraying machine and Linemark iGO line markers, designed for precision spraying with Herbafer colorants (pigments and paints). Works well with all liquid treatments (fungicides, herbicides, wetting agents, etc.). It is a stainless steel applicator, supplied with interchangeable nozzles and 2.5 meters of extensible hose. Designed for precision treatments on localized grassy areas of golf greens, gardens, sports fields and other types of turf
