

Herbasprayer

Precision walk-behind turf sprayer designed for applying paints and chemicals. Ideal for distributing Herbafer colorants

BENEFITS

- Unique for uniform coverage of paints and pigments, is also excellent for precision treatments with pesticides and foliar fertilizers
- Spray coverage reaches 1.8 meters wide, ideal for gardens, sports fields (penalty areas), greens and tees
- Flexible: 3 independent and regulated nozzles that spray from 0,6 to 1,8 meters
- Excellent for lance treatments with Herbalance and, in particular, for spraying total herbicides on gravel pathways
- Quick and easy to prepare and use; ready in half a minute, can be cleaned after use in 40 seconds without special tools

TECHNICAL FEATURES

Electric spraying machine designed, thanks to a special pump, for treating lawns with Herbafer colorants and all liquid chemical products. With a 20 liter tank, 1.7 metre bar, large wheels, a wide and reinforced frame and an adjustable handlebar, it is supplied with a 12v battery, a battery charger and charger holder, a nozzle holder and a flat fan nozzle set.

Optional available on demand:

- Spray lance Herbalance for localized liquid treatments and for drawing images or logos on the lawn

APPLICATION METHODS

Grass surface covered with 10 litres of solution is 400 m² (250 litres/ha).

The machine is compatible with Herbalance for all localized lance spraying
