

Special One

Dual action, Pigment and Spray Pattern Indicator, with superior, efficient and long lasting color effect, combined with a protective and stimulating action

TECHNICAL FEATURES:

Ensures the proper application of herbicides, fungicides, insecticides and liquid fertilizers without any phytotoxicity risks or burns, due to overlapping phenomena. Creates a beautiful natural green color that persists for 4 weeks after treatment, degrading slowly. Special One is resistant to ultraviolet light.

Reflects the infrared and ultraviolet rays, protecting against denaturation of antioxidant compounds, especially under stress conditions due to the attack of pathogens.

Increases photosynthesis efficiency. Hides the presence of diseases, weeds (*Poa annua*) and Localized Dry Spots, and speeds up turf's recovery, facilitating healing.

Increases spring soil temperature, creating a microclimate ideal for growing turf. Improves color uniformity and turf aesthetics in Fall, Winter, Summer and Spring.

Enters directly into the leaf tissues and is not eliminated by mowing.

APPLICATION GUIDELINES:

Cool season grasses : Use 1.5-2.0 liters / ha of Special One per 800 liters of water + pesticide .

In order to obtain the ideal dosage it is recommended, initially, to use Special One at maximum dosage. Once familiarized with the results, the operator will be able to better adapt for optimal dosage

- 1 . Fill the spray tank with water up to half capacity.
- 2 . Operate the agitator adding Special One
- 3 . Add any pesticide, fill completely the tank with water

Caution: Do not treat areas of stone, cement, tee marks, etc. Use appropriate shielding

Special One can be used as a long lasting spray indicator for hydroseeding. Added to the mulch - seed - water solution, the operator obtains a great accuracy, limiting spray drift and costly overlaps, covering evenly the entire area. Add a liter of Special One in 1000 liters of solution to be hydroseeded, then adjust the dose according to the visibility to be obtained.

PACKAGING: 5 kg bottles in 20 kg boxes
