

## Greener

**Extraordinary nitrogen-iron foliar fertilizer for sports turf and lawn gardens with instantaneous and long lasting greening effect  
N16 + 6 Fe (EDTA)**

### BENEFITS

- Ideal for preparation of special televised events, matches, tournaments, ceremonies etc.
- Stimulates chlorophyll production. Greens-up 4 hours after treatment with no growth picks and scorch risks. Color lasts up to 15-20 days
- Anticipates spring green up in late winter (end of February) without stimulating Poa annua growth
- Recommended, tank mixed with Recovery, for spoon feeding fertilizations. Corrects chlorosis and nutrients deficiencies when the root system does not work
- Tank mixed with fungicides speeds up recovery from diseases es. dollar spot, anthracnose, helminthosporium, etc. Improves the efficacy of growth regulators, preventing turf yellowings particularly on Poa annua
- Prevents and restores damages caused by herbicides. Prevents winter yellowing of tall fescue

### TECHNICAL FEATURES

16% Total nitrogen (N): 16% ureic nitrogen  
10% Total sulphate trioxide (SO<sub>3</sub>) water soluble  
6% Total iron (Fe) from ferrous sulphate (chelating agents: EDTA)  
Contains organic facilitators of foliar absorption

Greener is universally recognized as the best foliar turf greening product present in the market. It is manufactured with a proprietary formula that blends perfectly together iron chelates, pharmaceutical urea nitrogen and organic acids, foliar absorption facilitators.

### APPLICATION METHODS

On partially chlorotic (C3 and C4) lawns:

2.5-3.0 liters/1000 m<sup>2</sup> in 80 liters of water.

For spoon feeding operations tank mixed with Recovery:

1.5 liters/1000 m<sup>2</sup> in 80-100 liters of water.

Greener works best under normal growing conditions.

Increase dosage on grass suffering thermal or physiological stress.

Use product only when average temperatures are between 5°C to 32°C. Apply on dry grass in the cooler hours of the day. Do not irrigate for 6 hours after application. Avoid contact with walkways or other stone and cement surfaces.

Greener is compatible with most pesticides, with pigments and with other liquid fertilizers of the Herbafer line; it is always advisable to make a preventive test of miscibility

**PACKAGING:** 20 liter drums and 1 liter bottles in 16 liter boxes
