

Pickup 341

**Foliar potassium supplement, with phosphites. Contains solar radiation protective green pigments that hide diseases damages
K12 + C3 solar protective pigment**

BENEFITS

- Disguises leaf damages caused by diseases restoring green color and turf visual quality
- Provides a uniform natural light green coloration to cool season grasses (C3), hiding *Poa annua*
- Supplies potassium for stronger cell walls before heat and cold stresses. C3 pigment in summer protects from excessive infra-red light waves and in early spring anticipates green-up
- With all the benefits of phosphites; limits nutritionally fungal attacks, boosting plant's defensive systems
- Nutrient health protective supplement in winter when turf is attacked by *Microdochium*. Synergical with fungicides
- Nutrient health protective supplement in summer when turf is attacked by Anthracnose and *Pythium*. Synergical with fungicides

TECHNICAL FEATURES

12% Total Potassium (K_2O) water soluble
Contains: C3 far infra-red protective pigment
Contains organic facilitators of foliar absorption

Three for one potassium phosphite foliar formulation with specific far infra-red reflective pigments. Tri-synergic: the potassium + phosphites + C3 pigment combination improves turf quality by tripling the defenses against biotic and abiotic stresses, hiding, contemporaneously, visual damages. Manufactured through a proprietary formula, perfectly combines its ingredients with a foliar absorption facilitator that makes potassium immediately available. The results are pleasing, strong, vigorous and resistant lawns in the most difficult periods of the year, when grass is under attack by diseases and environmental stresses

APPLICATION METHODS

Preventive-curative applications: early Spring and early Autumn: 1.5-2.0 liters /1,000 m² in 80 liters H₂O
Repeat every two weeks.

Product efficacy is immediate, both on normal turf growing conditions or in case of fungal infection. Distribute on dry grass in the cool hours of the day. Do not water or mow the lawn for 6 hours after treatment. Avoid contact of the product on sidewalks or other stone surfaces.

PACKAGING: 5 Liters Drums

ON THE TURF'S SIDE
