

Recovery

Foliar rejuvenator and enhancer of enzymes and protein synthesis

Nutritional supplement and curative of all turf damages

NK 12/ 5 + 0,5% Fe + 0,3% Mn + 0,3 Zn

BENEFITS

- Heals quickly all damages caused by diseases. Recovers debilitated turf, speeding up color and re-growth
- Solves problems caused by continuous lawn utilization (play, wear, traffic, etc.)
- Recovers human errors (wrong aerations, low mowing, spray burns)
- Stimulates the formation of the enzymes responsible for resistance to physiological and pathological stresses (brown patch in particular)
- Feeds turf with N, K when root absorption is insufficient; recommended (with Greener) for spoon feeding summer programs
- Excellent foliar source of micro nutrients that integrate roots absorption
- Increases, immediately, turf vigour and physiological activity while forming new plant's tissues

TECHNICAL FEATURES

12 % Total Nitrogen (N) 1% amino acids (L) nitrogen, 1% nitrate nitrogen; 10% ureic nitrogen
5% Potassium oxide (KO) water soluble
0,5 % Iron (Fe) water soluble
0,3% Manganese (Mn) water soluble
0,3% Zinc (Zn) water soluble
Contains organic foliar absorption facilitators

Turf foliar nutraceutical supplement with L- amino acids from vegetal enzymatic hydrolysis. By stimulating the formation of specific proteins, contributes to the synthesis of plant's new cells and tissues and increases turf physiological activity . Its amino acids are components of the enzymes responsible for resistance to some biotic stresses (brown patch in particular), It is a proprietary formula, made with processes used in advanced biotechnology. Blends together amino acids and nutrients with special organic acids, facilitators of foliar absorption

APPLICATION METHODS

1,5 – 2,0 liters/1.000 m² in 100 liters of water
Herbafer Recovery works best under normal growing conditions. Use product only when average temperatures are between 5°C to 32°C. Apply on dry grass in the cooler hours of the day. Do not irrigate for 6 hours after application

Herbafer Recovery is compatible with most pesticides, with pigments and with other liquid fertilizers of the Herbafer line but it is always advisable to make a preventive test of miscibility

PACKAGING: 10 liters drums

Herbatech®
